MicroLog[®]

TCR-1000

Enter a telephone number and get a recording from months ago in a flash!

- Recording automatically starts when a call is established
The call logging can carry on endlessly without your care
- Analog/digital/mobile phone compatibility
- System storage capacity based on the CF card you choose
- Recordings can be downloaded to a PC
- Search by date, time, or telephone number

Advantages and Benefits

The MicroLog is the new generation single-line telephone digital recorder. In addition to speech recording, it stamps current date and time to the speech and can also tag Caller ID or dialed phone number, if any.

The MicroLog embraces the power of the commonly used CF card. It holds accurate records of the deals thru your work or home phones, freeing you from hidden deception or threat. All records are downloadable to a PC whenever desired.

The MicroLog is plug-n-play. By the use of the illuminated LCD display and a well-organized keypad, you can enter date, time or telephone number and get the recordings you are looking for; hence you can launch voice replay immediately.

The MicroLog includes a built-in microphone, which enables it be placed on the desktop for note taking purposes. It also includes a mobile phone connection interface, which makes mobile phone recording possible.

Major Features

- Recording automatically starts when a call is established.
- System storage capacity relies on the size of the CF card of your choice. Capacity can range from several to hundreds of hours.
- Archiving management capability, by which recording can be endlessly conducted without your care.
- Easily holds your records for weeks or months, call traffics and size of CF card are influential.

Σφραγίδα Συνεργάτη
